NEXT PROJECT: ANOMALY – EP, DATE TBA

PRODUCER CHRISTOPH WIECZOREK, SAWDUST REC.

Retrace The Lines are a six-piece modern metal band from Valencia, Spain, active since 2010 and fully independent. The band has released five records and played more than 75 shows across Europe and Asia, including Hellfest Le Off 2026. Their new single, Pain, is out now with an official video. It precedes Project: Anomaly, a concept EP mixed and mastered by Christoph Wieczorek (Electric Callboy, Annisokay, Novelists).

Retrace The Lines formed in Valencia in 2010 and have operated independently ever since, handling their own booking, recording, video production and visual identity. The sound sits between metalcore and the melodic intensity of 2000s post-hardcore: sing-along choruses, fat riffs and a live show built on precision, energy and visuals.

Getting a Spanish metal band out of Spain is the hard part, and the band has done it the long way. In 2017 it completed an 18-date tour of Japan and China, booked and financed on its own. Back home it founded Retrace The Fest, its own festival in Valencia, now two editions in and a clear success. In June 2026 it played Hellfest Le Off in Clisson, France, and the band keeps pushing outwards, looking for new frontiers.

The single Dopamine (2025) passed 128,000 streams on Spotify and 75,000 views on YouTube, reaching an audience beyond the Spanish scene. Now the new single, Pain, the second track from Project: Anomaly, mixed and mastered by Christoph Wieczorek at Sawdust Recordings (Electric Callboy, Annisokay, Novelists, Future Palace), is on its way to beating those records.

Project: Anomaly is a concept EP about a clinic where a controlled process goes wrong. The story unfolds in three acts: leaked files that suggest something failed inside the facility, the sessions themselves, in which each song is a different mental state rather than a place, and the collapse that the EP documents. Online it lives as The Stability Office, an interactive site built by the band where the audience pieces the story together. The release date will be announced.

01 — NEW SINGLE + OFFICIAL VIDEO — OUT NOW

PAIN

Pain is the second single from Project: Anomaly and one of the fastest, heaviest tracks the band has written, with the biggest breakdown in its catalogue. The lyrics deal with the frustration of recovery and the struggle to keep going without giving up. Mixed and mastered by Christoph Wieczorek (Annisokay, Electric Callboy, Novelists) at Sawdust Recordings.

The video takes place in a fictional clinic built by hand by the band members, with frame-by-frame animation and the same attention to detail that defines the music. Pain presents the final session of the story: Project: Anomaly is told in reverse order, and each release reveals how it got there.

02 — NEXT

PROJECT: ANOMALY

A seven-track concept EP, released over 2026, mixed and mastered by Christoph Wieczorek. The band opened it by wiping its social media and publishing a single statement from the Department of Human Stability, a fictional institution whose archive, stabilityoffice.org, works as a digital escape room: documents, recordings and case files the audience has to unlock. The clinic was built physically by the band and is the set for every video.

“Project: Anomaly is about our constant need to analyse ourselves, label ourselves and look for an explanation for what happens to us. The clinic is a fictional institution, but it represents a process that happens inside you.”
